

Term 3 and 4 - Marvellous Moments in Maple

Maple have been busy making the most the early spell of good weather; we made use of the outside learning space to explore one of the Discovery List items. Some of the children opted to make campsites for themselves, others made camps, for mythical, fantasy creatures. Miniature villages and a cosy looking nest for The local birds were also a popular choice.

STEM week activities allowed us to develop our understanding of our science topic (Forces and Magnets) and integrate it with our Flow topic which covers rivers, mountains and the water cycle. We made tin foil boats to see whose design could carry the most paper clips before sinking. The record was 120 paperclips!

Our seeds have sprouted! We are looking forward to ticking off another Discovery List item by cooking and eating something that we have grown. Peas, sprouts, peppers, tomatoes, cucumbers, radishes and basil have all begun to grow. Yum!
