

Jansson Class Marvellous Moments Term 1 & 2 2019

We made Egyptian cartouches using clay. We wrote our names on them in hieroglyphs.

We designed and made Egyptian Shadoufs in the outdoor area using materials which we found. It was tricky but we showed resilience!

During STEM week we completed a CREST challenge- designing and testing spinning helicopters to see which design was the best.

We learnt about the negative impact disposable plastic is having on our oceans and created posters

with ideas of how to reduce our plastic waste.
