

Safer Internet Day

Mrs Larcombe started our e-safety week with an interactive assembly discussing how we use the internet and how we can use images safely on the internet. The children were engaged and made responsible comments on how to keep their personal information safe and thinking about what photos we post online. Throughout the past week, all classes have been discussing and creating outcomes for e-safety week including writing play scripts for role plays, making scratch animations with sprites, creating posters for how to be safe and singing songs. Also, they have watched internet safety videos, shared experiences of how they use the internet, answered quizzes and made their own quizzes.

Alfie and I wrote a play script. We were on the laptop and we saw a pop up. It said "Do you want to come to my house for tea?" We acted out how to respond safely.
Natasha, Year 4, Willow Class

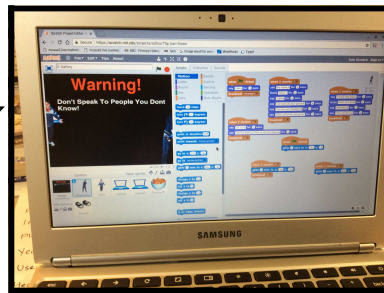

We got Boris to give help to Scratch the cat so he can use the internet safely! We used the Scratch Jr app to create e-safety dialogue between our characters to make an animation.
Year 1/2, Badger Class

We have learnt how to be safe online by having class discussions, creating a poster and watching a video. Then we created our play scripts on e-safety.
Natasha, Year 4, Willow Class

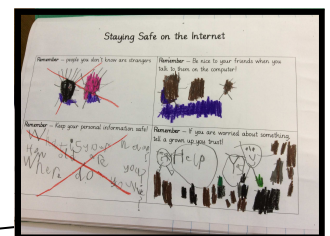

Year 4 have written and acted out their own play scripts about being safe on the internet.

We made a Scratch animation with the motto be careful who you speak to. We watched a CEOP video where he was taking pictures so we took inspiration from that. **Tyler, Year 6, Chestnut Class**

I made a poster about being safe on the internet. You must not tell anyone your name and you need to tell a grown up you trust if there is a problem.
Lucas, Year 1, Squirrel

Look at the Oakwood Primary Academy website to see more e-safety information

The 'Digital Parenting' Magazine which was given to every child is a useful resource featuring lots of advice and articles for how to support your children using the internet.
